

Sprint 2 Report

Smartmeal

Smart team

2/3/2023

Actions to stop doing:

- Naming a feature completely done without documentation. This can lead to a disconnect between the frontend and the backend as it can be difficult to understand what the code is doing without a clarifying document comment.
- Need to start writing unit test for the code being produced

Actions to keep doing:

- Our scrum meetings are from 1:15 to 1:30 pm on Monday, Wednesday, and Friday and we plan an in-person meeting every 1-2 weeks to discuss difficulties and the direction our product is going. This clean and consistent form of communication allows us to pivot quickly in case we run into any roadblocks as well as allow for people to comfortably give feedback to the rest of the team.
- Keep the scrum board fully up to date at the end of every scrum meeting.

Work completed:

- Landing page
- Allow users to add their own recipes
- Alternatives to ingredients in recipes
- From a meal plan, generate a grocery list of ingredients needed to cook the meals.
- Link login backend and frontend
- Sidebar
- Link homepage frontend and backend
- Users can search for public meals/recipes

Work not completed:

- N/A

Work Completion Rate:

- Total number of user stories completed: 7
- Total number of estimated ideal work hours completed during the prior sprint: 38
- Total number of days during the prior sprint: 14
- Our user stories per day across this sprint was 7 user stories over 14 days, rounding out to be 50% of a user story progress per day.
- For our work days, our work would be for roughly 3 hours per day, depending on the issue at hand, it may increase to up to 5 hours or down to 1 hour.
